

Charity Fundraising Efficiency Guide

Find out where donor acquisition and retention are actually breaking down — before cutting activity that's still working.

1. Donor acquisition

- ☐ Are donor acquisition costs rising while average donation values stay flat?
- ☐ Can you tell which channel drives sustainable givers, versus one-off donations?
- ☐ Do campaigns that used to work still perform the way they did?

2. Team capacity

- ☐ Is a small team stretched across too many channels to do any of them well?
- ☐ Is there a documented, repeatable process, or does it rely on institutional memory?
- ☐ Would fundraising continue smoothly if one key person left?

3. Reporting

- ☐ Are trustees or leadership asking for better ROI reporting than you currently have?
- ☐ Do you know your cost per acquired donor, and per retained donor?
- ☐ Could you defend your channel mix with numbers, if asked today?

How to read your answers: charity budgets need every pound to count more than most — small fixes here tend to matter more than they would elsewhere.
