

The Hospitality Bookings Diagnostic

Find out why tables, orders or bookings are not filling before spending another pound on reach.

1. Demand: are the right people finding you?

- ☐ Do you know which channel brings in new customers rather than repeat ones?
- ☐ Are you visible in local search and maps, as well as social channels?
- ☐ Do weeknights stay quiet even when weekends or events are busy?
- ☐ Is spend concentrated on awareness when the real gap is conversion?

2. Booking route: can they act quickly?

- ☐ Can someone book a table or place an order in under three clicks from Instagram or Google?
- ☐ Do delivery platforms bring volume but leave you without margin or usable customer data?
- ☐ Is the booking or ordering route fast and genuinely mobile-friendly?
- ☐ Do you know where people drop between interested and booked?

3. Measurement: can you prove the sale?

- ☐ Can a booking or order be connected to a campaign, channel or source?
- ☐ Is marketing handled reactively between service, with no fixed review cadence?
- ☐ Do you know cost per booking and contribution, rather than only total ad spend?
- ☐ Could you tell whether a marketing change caused the revenue change?

HOW TO USE YOUR ANSWERS

Mark every No or Not sure. Identify whether the first leak sits in demand, the booking route or measurement; fix that broken step before buying more reach.

Faisal Mahmud

FRACTIONAL MARKETING DIRECTOR

Built an award-winning hospitality brand myself, not just advised on one.
