

# Charity Fundraising Efficiency Guide

Find where donor acquisition and retention are breaking down before cutting activity that is still working.

## 1. Donor acquisition

- ☐ Are donor acquisition costs rising while average donation value stays flat?
- ☐ Can you separate channels that drive sustainable givers from those that drive one-off donations?
- ☐ Do campaigns that used to work still perform the way they did?

## 2. Team capacity

- ☐ Is a small team stretched across too many channels to run any of them consistently?
- ☐ Is there a documented, repeatable process, or does delivery rely on institutional memory?
- ☐ Would fundraising continue smoothly if one key person left?

## 3. Reporting and retention

- ☐ Can leadership see acquisition cost, donor value and retention in one view?
- ☐ Do you know your cost per acquired donor and cost per retained donor?
- ☐ Could you defend your channel mix with evidence if asked today?

### HOW TO USE YOUR ANSWERS

Mark every No or Not sure. Start with gaps affecting donor lifetime value, retention or data ownership; these determine how confidently you can protect or reallocate spend.
