

Healthcare Patient Acquisition Funnel Audit

Separate measurement gaps from genuine acquisition problems before increasing budget to compensate.

1. Channel clarity

- ☐ Can you separate channels that create new demand from referrals and returning patients?
- ☐ Do you know acquisition cost by channel and by qualified appointment, not only in aggregate?
- ☐ Has your channel mix changed using evidence, or stayed the same by default?

2. Alignment and governance

- ☐ Do marketing, clinical and commercial teams agree on what growth means and how it is measured?
- ☐ Is one person accountable for patient acquisition performance end to end?
- ☐ Is there an approved process for testing compliant changes quickly?

3. Measurement

- ☐ Are consent behaviour and event firing checked before anyone interprets a trend?
- ☐ Can a qualified enquiry or booked appointment be connected to its channel within your privacy controls?
- ☐ Could leadership understand performance, data confidence and next action in five minutes?

HOW TO USE YOUR ANSWERS

Mark every No or Not sure. Validate tracking and channel definitions before changing budget; a measurement failure can look identical to a patient acquisition decline.
