

Healthcare Patient Acquisition Funnel Audit

Find out where patient acquisition costs are actually rising, before you spend more to compensate.

1. Channel clarity

- ☐ Can you tell which channel brings in new patients, versus just referrals?
- ☐ Do you know your acquisition cost by channel, or only in aggregate?
- ☐ Has your channel mix changed in the last 12 months, or just stayed the same by default?

2. Alignment

- ☐ Do marketing and clinical teams agree on what "growth" actually means?
- ☐ Is there one person who owns patient acquisition strategy end-to-end?
- ☐ Are compliance concerns making your team avoid testing anything new?

3. Measurement

- ☐ Do you trust your platform-reported numbers, or sense-check them independently?
- ☐ Can you tie a specific new patient back to a specific channel or campaign?
- ☐ Would leadership understand your acquisition reporting in five minutes?

How to read your answers: if you answered "no" or "not sure" to more than half of these, the issue is very likely fixable within weeks — it usually just needs someone senior enough to own it properly.
